A MESSAGE FROM OUR PRESIDENT, DICK PIPPEN, RPIPPEN@COMCAST.NET

Greetings Orchid Lovers—Ladies—how would you like a burlap skirt covered with blooming Ghost Orchids, or Men—how about a shirt of the same? Well, theoretically (and I say theoretically) that is possible based on some research done by a professor at the University of Florida. This, along with very exciting information on the continuing study of the Ghost Orchid in SW Florida and Cuba, was reported by Dr. Larry Zettler, Illinois College, at our July meeting. In addition to Dr. Zettler, the two interns from Illinois College that we are supporting to continue the Ghost Orchid research in the Panther Preserve, Adam Herdman and Jack Waggoner were present and introduced. (I don't really think anyone wants itchy burlap clothing, even with Ghost Orchids—let's just enjoy them "in the wild.") We were dismayed that Dr. Ernesto Mujica was not able to join us due to some "glitches" in getting his visa, but we are encouraged that he did in fact get his visa and will be joining the interns in the Panther Preserve for most of July.

In the "For What It's Worth Department"—I read somewhere (actually in OrchidWiz) that the pseudobulbs of Dendrobium canaliculatum were eaten by aboriginals in northern Queenland, Australia. They would strip off the leaves and boil the pseudobulbs. It doesn't say what they tasted like. I have trouble keeping one plant alive. I can't imagine having enough to "sacrifice" a bunch of stems for dinner. Oh well.

Our August meeting will also be an exciting one. We will welcome back as guest speaker—Alan Koch from Gold Country Orchids, Lincoln, CA (see brief bio below.) Alan has visited us several times in the past and always has a great presentation. His talk this time will be Cattleyas 365, 24/7. Alan specializes in miniature Cattleyas. Hope you can all make it. Until then—keep your orchids happy….*Dick*

ABOUT OUR AUGUST SPEAKER, ALAN KOCH

Alan owns and operates Gold Country Orchids where he specializes in miniature and compact Cattleyas. Alan started growing orchids in 1969 with 3 Cymbidiums given to him by an aunt. While in college, he became interested in other orchids and discovered many would grow outdoors in Southern California. He has moved five times as his orchid obsession has led to the need for more growing space. With the last move, he purchased 10 acres of land in Lincoln, California for his 300,000 orchids. He is recognized as an expert in the Brazilian Cattleya alliance and a trend setter in miniature Cattleya breeding. Alan has been published in the Orchid Digest, and the American Orchid Society magazines. He has also been published in the proceedings of the World Orchid Conference. He is an internationally known speaker. He is a past member of the AOS Judging Committee, and the Research Committee, as well as an Accredited Judge and is Vice-chair and Training Coordinator for the California Sierra Nevada Judging Center. Alan also served two terms on the Orchid Digest Executive Committee and Board of Directors, and is one of the current directors, as well as a Trustee for the AOS. (*Borrowed from the Coalition of Orchid Species July 2014 Newsletter, from the website*.)

Alan will be offering a 20% discount to NOS members for their pre-orders with orchids delivered at the August 4 monthly meeting. Gold Country Orchids, 390 Big Ben Rd, Lincoln CA 95648, 916-645-8600, gcorchids@aol.com. Discount Information: We offer a 20% discount on all preorders and free freight when Alan comes to speak at your event. To be able to take advantage of this you need to do the following:

Under discount enter the following code, GCOD (case sensitive.) Under shipping enter ship to a society.

Under comments enter the name of your society or event we are to bring your plants.

July monthly meeting attendance: 79 Raffle table proceeds: $194 Vanda sales proceeds: $150

CARE AND CONDOLENCE: A sympathy card was sent to NOS member Kris Morton for the loss of her husband. A get well card was sent to Judy White for her knee surgery.

<u>August 5-6:</u> 6th Annual Cattleya Symposium, held by Odom's Orchids at Indian River Research & Education Center, 2199 South Rock Road, Ft. Pierce, FL; Info: www.odoms.com.
<u>August 20:</u> NOS member Ralph Brand will have his annual orchid sale,
9 am – 12 noon, 443 Dundee Ct., phone 239-649-1325; Cattleyas in pots or bare root at reasonable prices.
<u>September 10-11:</u> Florida West Coast Orchid Society Show & Sale, Pinellas Park, FL;
Info: sfraser0326@aol.com.
<u>September 30-October 2:</u> South Florida Orchid Society Show "Orchid Celebration," Coral Gables, FL;
Info: Dan Christensen, 954-252-8116; damorchid@aol.com.
<u>October 22-23:</u> SWFL Yard & Garden Show, UF/IFAS Collier Co. Extension, 14700 Immokalee Road.

TASKS FOR AUGUST

From Florida Orchid Growing – Month by Month by Martin Motes, Phd.

- **Finish cutting teretes and reed stem epidendrums early in the month.**
- **Reset strap leaf vandas early or not at all.**
- **Dry hard once or twice.**
- **Continue anti-fungal spray program.**
- **Apply snail bait lightly twice, ten days apart.**

AOS CORNER

Bill Overton, AOS Rep.
digicatpaw@yahoo.com

AOS Website is Updated

I have some wonderful news to share with everyone. After several months of anticipation the AOS has launched its updated website. I have been cautiously optimistic with regard to this re-launch hoping that some of the rumors I have heard about the site were true. I can report to you all that the new site is fantastic!

Just yesterday I spent a half hour going over a few of the changes. Aside from the "new look" to the web page, there are several new features. There are now more areas of information located on the site including a largely expanded area on culture and culture sheets. Those sheets have been updated and expanded upon and are still downloadable and printable from a PDF file.

There has been a great deal of information added to the web page, including a complete list of upcoming webinars. Then, much to my pleasure, I looked into the section on Orchid Pests & Diseases. This can be found under the All About Orchids tab on the top of the web page. When you open up this section you will see a table of contents with information on controlling aphids, mealy bugs and other critters. There are not only detailed pictures of insects and the damage they cause, but a wonderful explanation of 'heat stress' in orchids. Diseases such as black rot and root rot are described, in addition to other diseases.

I am so pleased with what I have seen so far from the new AOS web site. I encourage everyone to explore it for themselves. Until next time……*Bill*

Minutes of the NOS Monthly Meeting
July 7, 2016
Submitted by Cynthia Bock, Secretary

President Dick Pippen called the meeting to order at 7:30 pm. He reviewed the emergency exits and emergency procedures.
Dick announced and thanked the refreshment organizers, Mary Jo Shively and all those who brought in the tempting goodies. He announced that we still have a number of Martin Motes Month-by-Month Guide to Growing Orchids books for sale.
Dick introduced the interns who are working with Dr. Zettler.
Our speaker next month is Alan Koch.
Membership chair Veronica Catrombon announced that we have 208 members and 111 Facebook likes! Please pick up your new Membership Directory.
Dick welcomed a number of visitors.
Kit introduced the presentation tonight featuring our Scholarship Fund sponsored interns and Dr. Lawrence Zettler, Professor of Biology and Director of the Orchid Recovery Program at Illinois College.
Plant Table winners were announced. Raffle winners were drawn.

FROM "A REVISED GLOSSARY FOR ORCHIDISTS"

Elaine Baxter Cantwell

- **Compact grower: Can be counted on not to take over the entire growing area.**
- **Vigorous grower: Stock up on plant stakes & 18" pots. A machete would help too.**

MORE PESTS AND DISEASES INFO:

From "Growing Orchids is Fun"

BACTERIAL LEAF SPOT (Pseudomonas spp; Xanthmonas spp.)

This is a very fast moving problem that usually starts as a water soaked lesion with characteristic yellow or black halo. The wound(s) tend to weep an ooze of bacterium that is very easily spread by splashing water, or by wind. Infected areas should be removed immediately, cutting at least one-half inch into healthy tissue with a flamed, hot part of sharp clippers (which will help to seal the cut.) Apply a dry fungicide powder to the cut to assist in rapid sealing of the wound. Phalaenopsis are the most commonly affected varieties due to their moist growing conditions compared to other types of orchids. Isolate and treat any infected plants. Discard any plant(s) where the crown is the infected portion. Some growers have found the application of cinnamon powder to be effective if the infection is detected early enough. A spray of hydrogen peroxide ofr copper has also been found effective.
DO NOT USE COPPER SPRAYS ON DENDROBIUMS, AS IT WILL DEFOLIATE THE PLANT.

AND THIS FROM NORM DOLDER:

Looking for someone to care for your orchids while you are away on vacation? Need help with repotting? This gal is available, reliable and knowledgeable: Gloria Restrepo can be reached at 239-293-8083.

An Orchid Vignette—The "Yams" Have It

Yamadaara—where on earth did they ever come up with a name like that!! Well, it's easy—*Yamadaara* is a complex genus involving a *Brassavola* x a *Cattleya* x an *Epidendrum* x a *Laelia*. Huh!! So that's all. What happens when more than three genera are involved in a cross, and a combination of those generic names becomes unpronounceable, then "they" name the genus after someone notable or important (hopefully) in the orchid world. They take the person's name, Yamada, and add "ara" to the end. So in this case it becomes *Yamadaara*. It was Rev. Masmo Yamada of Waimanalo, Hawaii for whom the genus was named. Beyond that, I have not been able to learn anything about the man. Ok, now to the "crux of the matter." I have two Yamadaaras that I like very much: *Yam*. Queen Adelia and *Yam*. Redland Sunset.

Yam. Queen Adelia is a cross between *Blc*. Orange Nuggett and *Yam*. Sammy Evans. It was created and registered in 1998 by Dr. Bernadino G. Cagauan Jr., of Hawaii. The grex has received four AOS awards, two AMs and two HCCs. The cultivar I have, is one of the AMs—'Kiilani.' As pretty as it is, it has never been used as a parent in any crosses. I got my plant as a bareroot division at an NOS "April Potting Exercise" in 2009. I potted it in a clay pot in a mix of Lava rock, charcoal and perlite. It has bloomed faithfully for me very year. Unfortunately it blooms only once a year, in the summer, but it is worth the wait ☺.

My other *Yamadaaara* is *Yam*. Redland Sunset. This is a cross between *Blc* Orange Nuggett x *Encyclia cordigera*. Huh! *Blc*. Orange Nuggett is a parent of both Redland Sunset and Queen Adelia, neat!! This grex was created by Puanani Orchids of Hawaii, and registerd by R.F. Orchids of Homestead, FL in 2000. Hey wait a minute, the owner of Puanani Orchids is Gavin Yamada of Waimanalo, Hawaii. I betcha that Masmo Yamada was his father or at least a relative—just a guess. I also got this plant in 2009 but at the NOS Orchid Show, from R.F. Orchids. It has also been a good bloomer for me, but blooming earlier than "the Queen," usually in February or March, right around Show time. In fact, at the NOS Show in 2011 I got a blue ribbon on my plant. In the NOS 2012 Orchid Show, my plant earned a Red Ribbon AND Best Hybrid with *Epidendrum* or *Encyclia* Breeding. I grow this one in a clay pot in a lava, charcoal, perlite mix. This grex has earned three AOS awards, all HCCs. The one I have is 'Crownfox Ruby,' which was awarded to R.F. Orchids in 2001. Like "the Queen," Redland Sunset has not been used as a parent in any cross.

Alas now with all the name changes in the orchid world, *Yamadaara* is an obsolete genus, all of its members having been transferred to other genera. This is mostly because Brazilian Laelias are now Cattleyas, most of the Epidendrums used are now Encyclias, *B. digbyana* is now a *Rhyncholaelia*, and so forth. Sooo *Yam*. Queen Adelia is now in the genus *Louiscappeara* and *Yam*. Redlands Sunset is now a *Bullara*. I think I still prefer *Yamadaara*, but whatever they are called, they are both neat plants for your collection.
